

How to imagine a 4-dimensional space? Easy! Imagine N -dimensional space, and then imagine that N is equal to four.

To defuse the module, go to the shown coordinates and press display.

Use the buttons on the right of the module to rotate (Left/Right; Up/Down; Ana/Kata) and the large button on the bottom to move Forward.

The module also has a button for switching the display mode. The normal mode only shows the walls adjacent to the defuser. The advanced mode has a higher display range. Advanced mode is enabled by default.
